Wiring diagram (120V AC Triac dimmable)

SWITCH TEST PROCEDURE:

- When the main power supply is connected and the unit is in normal mode, press the test button to switch to emergency mode.
- If the test button is not pressed, the unit remains in charging mode.
- In emergency mode, press and hold the test button for 3 seconds to exit emergency mode. Battery maintenance: charge-discharge at least once every three months to maintain battery life. Do not leave the battery idle or continuously charging for more than 6 months.

INSTALLATION PLUG-IN BATTERY BACK-UP KIT

ASD-EMK-JBR sold separately:

- Turn off power before installation and remove any existing fixtures. Open the emergency power supply cover, remove the required knockout on the side panel, install a suitable cable clamp (not included), feed the power cable through it, and connect the wires.
- Insert the emergency power supply into the mounting hole and secure it. The hole must be larger than 3-1/8 inches or the unit will not fit. Connect the fixture power cable to the emergency power supply.
- Remove the adhesive backing from the indicator light and attach it to the fixture surface. Push the spring clips in to the mounting hole and insert the fixture; it will sit flush with the ceiling. Restore power and press the test switch to verify operation.
