

LED SECURITY FLOODLIGHT

► **DESIGN** - LED DUAL-HEAD SECURITY LIGHT WITH MOTION SENSOR is a great way to keep your home safe at night. 360° rotatable light heads allow you to direct light where it is needed. It is designed to operate on 120-277V or 120V circuits.

► **FLEXIBLE SETTINGS** - Built-in motion sensor has sensitive 180° detection angle and 70ft long detection distance. ON TIME mode: motion sensor and daylight sensor - off, light always on. AUTO mode: when motion is detected in darkness, the lights will turn on. D2D (Dusk To Dawn) mode will automatically turn on at night and stay off at daytime.

► **COLOR SELECTABLE** - You can choose either a 3,000K warm white, 4,000K cool white or 5,000K daylight color temperature.

► **APPLICATION** - Perfect commercial or industrial solution for both indoor and outdoor applications such as: porches, backyards, front doors, driveways, walkways, workshops, storage rooms, and more. It is also Wet Locations rated.

► **ADVANTAGES** - With a lifespan of 60,000 hours, these fixtures are made to last decades under normal operation! ASD provides a 5-year limited warranty along with ETL and certification to guarantee top quality products and safety!

BUILT-IN MOTION SENSOR INFORMATION

Sensor has three selectable modes:

On-Time: Motion sensor and daylight sensor -off, Light always on.

How to set: Sliding the "Arrow Line" to the "On-Time" mode, other knobs don't need to set.

Auto: When motion is detected in daytime, the indicator light inside the sensor blinks twice, but fixture will not come on. When motion is detected in darkness, the lights will turn on. **How to set:** Slide the "Arrow Line" to the "Auto" mode. Rotate the "lux" knob counter-clockwise all the way to the left (to the minimum setting). Adjust hold-time by rotating "Time" knob. Adjust detection range by rotating "Range" knob. If you rotate "lux" knob clockwise all the way to the right (maximum setting), the light will turn on during daytime and night when motion is detected.

D2D: The fixture will turn ON at dusk when the unit detects reduced light intensity (between 5-50 lux (0.5-4.7 fc)). The fixture will turn OFF at dawn when the unit detects increased light intensity (between 35-400 lux (3.3-37 fc)). The "D2D" Mode setting does not detect motion. **How to set:** slide the "Arrow Line" all the way to the right to the "D2D" mode. Rotating the "lux" knob counter-clockwise all the way to the left (to the minimum setting). "Time" and "Range" don't need to set. The "D2D" Mode setting does not detect motion.

D2D function is not available for these items.

The fixture is set to "On-Time" mode by default.

LED SECURITY FLOODLIGHT

INSTALLATION GUIDE

IMPORTANT SAFETY INFORMATION:

Please read all the instructions below before installation.

- ▶ Make sure that the supply voltage corresponds to the rated product voltage.
- ▶ The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.
- ▶ If the product is damaged, do not use it.

INSTALLATION STEPS:

1. Attach crossbar to the outlet box using two mounting screws.
2. Thread the fixture wire through the gasket. Connect the wires: Black to Black, White to White, and Green wire reel up to the green screw. Screw up green screw into the hole on the cross bar. Secure the connection with wire nuts. Change the position of the CT switch on the housing to the desired color temperature.
3. Drive the bracket screw through the center hole of the fixture base to the crossbar and secure by tightening it. For outdoor locations it is recommended to use silicone (not included) as shown in the picture.

⚠ WARNING

RISK OF PERSONAL INJURY – READ and follow all WARNINGS and installation instructions. Keep or give to the owner for future reference.
